

PVC & RUBBER CRASH DOORS INDUSTRIAL SOLUTIONS

Overview

Our Crash Door Range offers an ideal solution for industrial, hospitals, food preparation, wash down and clinical applications.

Each door incorporates a choice of high quality materials and colours depending on specifications. All models are individually designed to ensure a safe, long-term beneficial, reliable operation. Each door is designed to require minimal maintenance and optimise work-flow, improve the working environment, control dust, noise and save energy (Please refer to the specification chart for a list of available options and finishes for this style of door).

All doors are suitable for use in a broad range of applications, environments and industries. Some of these include:

- *General Storage & Industrial Locations*
- *Hospitals*
- *Food Processing & Packaging*
- *Clinical & Hygiene*
- *Cold Storage*
- *Logistical & Warehousing*
- *Light & Heavy Commercial*

Advantages

Usually used to partition particular areas our Crash Doors provide a cost effective robust solution to many day to day demands. The robust design of our Crash Doors ensure long term reliability and operation.

All doors are resistant to extreme humidity and low temperatures, oil, grease and various paint products. Buffer strips can also be installed where a dedicated crash method of operation is required.

Each set of doors is supplied with hold open hinges and incorporates a 2-way swing method.

Operation

- Manual Crash Method – (Standard)
- Push Method - (Standard)

Safety Features

Each door comes complete with a double action hold open hinge to allow each leaf to be set open to avoid unnecessary crashing.

Vision Panels

Each door includes a clear transparent PVC upper section as standard. This allows personnel on either side of the opening to see who and what is on each side of the door. Upper sections can be customised to suit and removed completely if required.

Panel Options

As standard we supply all doors with 8mm Lower Rubber and 7mm Upper PVC Panels. Other styles including reinforced options and thicknesses can be supplied on request.

Standard colours currently available are:

- White
- Cream
- Yellow
- Orange
- Red
- Blue

Framework Options

All framework can be supplied in standard galvanised finish or optional stainless steel or painted/powder coated finish.

Design & Reliability

SPEEDFLEX™ has a proven track record of manufacturing and designing doors for many blue-chip companies around the world. All doors are meticulously designed and tested to ensure maximum reliability and performance.

Maintenance and Service

Our entire door range has been designed to require very little maintenance. In the benefit of safety we do suggest all doors are inspected by one of our trained engineers on a periodic basis to ensure trouble free operation for the life of the product. For further information on caring for the product please visit our download section where you will find the necessary spare part and maintenance manuals.
