

PVC STRIP CURTAIN INDUSTRIAL SOLUTIONS

Overview

Our PVC Strip Curtain Range offers an ideal solution where cost effective access and partition solution is required.

PVC Strip Curtain is designed to require minimal maintenance and optimise work-flow, improve the working environment, control dust, noise and save energy (Please refer to the specification chart for a list of available options and finishes for this style of door) and keep the environment free from bugs, birds and mites

All doors are suitable for use in a broad range of applications, environments and industries. Some of these include:

- *General Storage & Industrial Locations*
- *Food Processing & Packaging*
- *Clinical & Hygiene*
- *Cold Storage*
- *Logistical & Warehousing*
- *Light & Heavy Commercial*

Advantages

Usually used to partition particular areas our PVC Strip Curtain provide a cost effective solution to many day to day demands. The robust simple design concept ensures long term reliability and trouble free operation for the life of the product.

All doors are resistant to extreme humidity and low temperatures, oil, grease and various paint products. Visual zone strips can also be installed where a visual aid is required.

Operation

- Manual Crash Method – (Standard)
- Push Method - (Standard)

Safety Features

Vision

Each door is usually supplied in transparent PVC as standard. This allows personnel on either side of the opening to see who and what is on each side of the door. Sections can be customised in colour and thickness to suit and various overlaps available.

Curtain Options

As standard we supply all doors with 2mm and 3mm PVC Strips. Other options are available including various overlaps. Other styles including reinforced options and thicknesses can also be supplied on request.

Standard colours currently available are:

- White
- Cream
- Yellow
- Orange
- Red
- Blue

Track Options

As standard we supply all tracks in galvanised steel. Stainless steel finishes are also available. In addition we supply a hook on (standard) type track and heavy duty bolt on version.

Design & Reliability

SPEEDFLEX™ has a proven track record of manufacturing and designing doors for many blue-chip companies around the world. All doors are meticulously designed and tested to ensure maximum reliability and performance.

Maintenance and Service

Our entire door range has been designed to require very little maintenance. In the benefit of safety we do suggest all doors are inspected by one of our trained engineers on a periodic basis to ensure trouble free operation for the life of the product. For further information on caring for the product please visit our download section where you will find the necessary spare part and maintenance manuals.
